

## Finance Bigtime

The money exists on computer screens.  
Treasury sends it forth. Banks do their  
insane dicing. Some say Ponzi.

Whatever. Illusion, at least in greater part.  
So what is real? Nothing much. Can we  
go on this way? More than probably...

with hiccups. But it's all crazy and  
dangerously so! Uh huh. Successful

people will take demented routes.  
Can nations? Stay tuned.
